Welcome back to Martins Creek Public School for 2015! How wonderful to see our students returning with big smiles, enthusiasm and boundless energy.

How proud we all were to see the exceptional talent and effort of all of our students at the annual Christmas presentation and concert. Well done Martins Creek Public School.

During the Christmas break, Mrs Rubeli and her daughter completed the waterfall textile collage which now hangs just inside the rear door of the classroom. This project was the culmination of our unit on water. Don’t forget to have a look and be impressed by the creative talents of our students and staff!

Our overall theme for the next few weeks is the Geology of the planet. The students will be studying rocks, soil samples and the earth’s origin, structure and composition. This theme will be studied through Literature, I.T., and Science lessons, culminating in a relevant excursion later in the year. As an introduction to this theme the students have sampled and identified three types of soil; clay, loam and sand and have looked at the properties of each. This afternoon, they were using clay to create pinch pots.

Yesterday was Term one Staff Development day. Mrs Tucker, Mrs Clements, Mrs Rubeli and Mrs Keller participated in Child Protection Training, and our teachers and SLSO spent time planning for Term 1. We are excited about ideas and activities to continue giving all our students the opportunity to learn, experience and grow.

News Roster for January/February

Thurs 29th  Zahra
Fri 30th  George
Mon 2nd Feb  Flynn
Tues 3rd  Chris
Wed 4th  Year 2
Thurs 5th  Grace
Fri 6th  Zahra
Mon 9th  George
Tues 10th  Flynn
Wed 11th  Chris
Thurs 12th  Year 2
